

Technology

TECHNOLOGY IS ALL AROUND US

Routinely Impact in our daily lives

- ▶ Technology has significant impact on how we live, work and play but a common definition of technology is elusive to many of us that's why it's important to provide bit of definition to the term of technology
- ▶ Decreased Privacy. We're spending more of our lives online than ever before. According to one report, Americans spent...

Types of technology

Technology

- ▶ System of practical knowledge and problem solving create tools is simply known as technology
- ▶ In today's world, we tend to equate the world technology with the world gadget. That's probably not the best way to think about it

Applied Technology

- ▶ The tools the gadgets and the gizmos created by technology is simply called as applied technology
- ▶ **Applied technology** means all Technology, and Intellectual Property Rights therein, developed, licensed, or acquired by Applied (other than from Brooks), either in connection with or independently of the activities undertaken pursuant to this Agreement.

Difference between technology and applied technology

Technology

- ▶ Technology is the system of practical knowledge, think of technology is the ideas

Applied Technology

- ▶ Applied technology on other hand are gadgets or gizmos created by technology

Advantages of Technology

- ▶ Technology had made human life comfortable
- ▶ Every thing we use in our daily life is the gift of technology from the clothes we wear, the house we live, the car we travel, and also the mobile phone we carry and there are also a lot of examples that are successful implementation of technology
- ▶ Education virtual classes are delivered at many schools be learning is a relatively new concept students make use of internet technology to download important study material in the form of text, audio and videos.

Disadvantages of technology

Increased loneliness :

- ▶ Social Isolation is on the expansion, individuals are investing more energy playing computer games, figuring out how to utilize new present day advancements, utilizing informal communities and they disregard their reality. Innovation has supplanted our old method for cooperating. On the off chance that a client can without much of a stretch collaborate with 100 companions on the web, they will want to go out to make new companions which at a later stage can prompt depression.

Security :

- ▶ Gratefully progresses in innovation have helped security, be that as it may, because of these advances, everything is associated with the web somehow. Our monetary records, our photographs, our autos, cell phone, everything contacts the web sooner or later. Because of the system of overall gadgets and frameworks, many have fallen prey to a personality cheat, hacked accounts by some fiendish programmer. The street to recuperation from these kinds of assaults can be to a great degree long and meticulous.

Conclusion

- ▶ Now let's discuss about the disadvantages of technology according to my opinion every thing in this universe has an advantages and disadvantages both its all up to you whether you use it in good manner or bad manner
- ▶ According to my point of view technology is really helping us because u can take current pandemic of covid-19 that we are studying online. And for that we are taking online education just because of technology laptops , internet, mobile, other many things also.
- ▶ So at the end technology has more advantages as compared to disadvantages.
